Eleven Year Endometriosis Completely Handled

From the ages of 12 to 23, I experienced the excruciating and debilitating symptoms of the disease called endometriosis that would strike without warning and would either last for a few days out of the month, or for entire consecutive months on end. It became a common occurrence for me to be rushed to the hospital at all hours of night and early morning suffering from excessive bleeding/clotting and pain so severe that I would lose consciousness and go into shock, and on my "good days" I would still feel extreme fatigue, problems concentrating as well as radiating pain throughout my abdomen, limbs and spine. Having experienced these symptoms for so long with doctor after doctor essentially telling me that this was just my rotten lot to learn to live with, I felt deflated, but not yet defeated. I wasn't satisfied with the "answers" I was getting from Western doctors and began to research into alternative methods of healing and achieving relief, eventually discovering wheat and gluten free eating which cut my pain and other symptoms literally in half. This was a great improvement - so great that I was able to go back to work and to work gainfully. However, it meant that I still felt horrible half of the time.

When my boyfriend first told me about Kangen water, he introduced it to me by saying, "once you drink this water, it will completely handle your endometriosis symptoms." I thought to myself, "well, I already hydrate myself really well... I can't see what would be so special about this water over all the other waters I've tried but hey, what do I have to lose?"

I'll tell you what I had to lose, and what I did lose, by drinking Kangen water; ALL of my excruciating, debilitating, disruptive, annoying, persistent, expensive, endometriosis symptoms!

According to a few doctors I have talked to since this revolution in my own personal health, this shouldn't be possible. One doctor actually told me, "Well, that's nice that you found something that helps you, but drinking water really isn't capable of curing anyone of endometriosis." I just smiled to myself because I have all the proof I need, my own empirical experience. I went from a life where pain, discomfort, and poverty were my "lot", to a life where I have energy and vigor, vitality and drive, clear-mindedness and a completely open horizon to me. This does not jive with what the pharmaceutical companies want the text books to say or the public to believe, but after running around the Western medical circuit, having drug after drug after drug pushed at my health problem with absolutely zero relief and zero results, I'm beginning to see that not everything is what it seems.

This water is definitely more than it seems to be at first glance, and I really hope that after reading this, you will take a look at it, yourself. I drank this water for a month and completely cured myself of an "incurable" disease. What can this water do for YOU? Ask yourself what I asked myself back when I first started drinking this water; what do you have to lose?

You just might find that all you have to lose are all the health complaints you've ever had. And I hope you do.

CHANGE YOUR WATER, CHANGE YOUR LIFE!

Katie Broquard - Age 23 - Virginia Beach, Virginia"
