

Tim:

I contracted Hepatitis C several years ago. My health deteriorated to critical condition and I was on the list for a liver transplant. My doctor told me there were no livers available for transplant which gave me about 18 months to live. I was bedridden when I took my first sip of Kangen™ water. After 2 days of drinking the water, the whites of my eyes were no longer yellow... they were white again! After 5 weeks of drinking the water I was out rehabbing houses again! Prior to drinking Kangen™ water, I was on a ridiculous number of prescriptions. I am now 99% free of those medicines! Kangen water™ gave me my life back!

---

Natasha:

I contracted Hepatitis C from my husband, Tim, 2 years ago. The doctors wanted me to go on interferon, which would keep me mostly bedridden for a year. I prayed for help and God brought Kangen™ water into our lives. After drinking the water for 3 weeks, my doctor re-tested and found no trace of Hepatitis C in me!! I'm healed!
